Education

Manipal Institute of Technology, Manipal

2023 – 2027

B.Tech in Computer Science & Engineering

Board of Technical Education, Karnataka

2020 – 2023

Diploma in Computer Science Engineering

Experience

Aroha Group, Udupi

June 2026 – Present

Software Developer Intern — React Native, TypeScript, Tailwind CSS, REST APIs, MongoDB

- Developed a cross-platform mobile application using React Native and Expo Router with 11 mood-based place discovery categories.
- Implemented GPS-based location search, dark/light theme support, favourites management, and search history using AsyncStorage.
- Integrated REST APIs to fetch and display dynamic location-based recommendations and enhanced user experience through responsive UI design and efficient state management.

Department of CSE, MIT Manipal

June 2025

Machine Learning Intern — Python, Pandas, Scikit-learn, XGBoost

- Developed and evaluated 5+ machine learning models including Random Forest, SVM, and XGBoost for depression prediction.
- Applied SMOTE, feature selection techniques, and hyperparameter tuning, improving model accuracy from 68% to 86%.
- Performed data preprocessing, exploratory data analysis (EDA), and model validation using k-fold cross-validation.
- Worked with Python, Pandas, Scikit-learn, and ML workflows for predictive analytics.

Projects

Smart Nearby Places Recommender — React.js, Node.js, Express.js, MongoDB Atlas, AWS EC2

- Developed a full-stack MERN application that provides mood-based place recommendations using real-time user location.
- Built secure REST APIs with JWT authentication and MongoDB Atlas for user management and personalized recommendations.
- Integrated SerpAPI to fetch location data and implemented intelligent filtering logic to improve recommendation relevance.
- Deployed backend services on AWS EC2 and optimized API performance for scalable usage.

Student Attendance Management System — Python, MySQL

- Developed an attendance management system capable of handling 500+ student records using Python and MySQL.
- Implemented CRUD operations, relational database design, and role-based access control for secure record management.
- Optimized database performance using SQL indexing and JOIN operations to improve data retrieval efficiency.

Technical Skills

Programming Languages: Java, Python, C, JavaScript, TypeScript

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js, Tailwind CSS, Django, React Native, JQuery

Databases: MySQL, PostgreSQL, MongoDB Atlas

Tools & Platforms: Git, GitHub, VS Code, Linux, AWS (EC2, S3)

Core Concepts: Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, REST APIs

Certifications

- Google AI Professional Certificate – Google, Coursera
- Python Programming Course – Manipal Institute of Computer Education (MICE), Manipal
